### **DETAILED ACTION**

#### ***Priority***

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 10/309,080, filed on 04 December 2002.

### **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

-Insert --, now U.S. Patent No. 6,682,176.-- after "December 4, 2002" in line 1 on page 1 of the specification.

#### ***Allowable Subject Matter***

3. Claims 1-7 are allowed.

#### ***Reasons for Allowance***

4. The primary reason for the allowance of claims 1-7 is the inclusion of the limitation of a micro-electromechanical fluid ejection device that includes a nozzle guard that is mounted on the substrate to be spaced from and cover the nozzle chamber structure, the nozzle guard including a body member that defines a passage that is aligned with the fluid ejection port so that fluid ejected from the fluid ejection port passes through the passage. It is this limitation found in the claims, as it is claimed in the

Art Unit: 2853

combination of, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Jarrold et al (US 6,561,627), Trauernicht et al (US 6,685,303) and Lebens (US 6,644,786) all disclose a micro-electromechanical ejection device having a substrate, a nozzle chamber and a thermal actuator.
